HEBREW ROMANIZATION

The American National Standards Committee Z39, on Library Work, Documentation, and Related Publishing Practices, is pleased to announce the recent publication of a new National Standard for the Romanization of Hebrew.

The new standard recognizes the need for a variety of romanization systems to serve diverse purposes. A General-Purpose style is provided for those having only a minimal knowledge of Hebrew and for others who wish to cite a form which only suggests the original Hebrew. A second system is the More Exact, and the third is designated the Narrow Transliteration. The latter makes full reversibility possible. For use in computer-compatible systems a fourth type is provided, also fully reversible.

It is anticipated that these several possible choices of systems will serve a broad spectrum of users and provide standard systems for most needs.

The subcommittee which developed this standard included representatives from the Hebrew Union College, the Jewish Theological Seminary, and the Library of Congress and other institutions concerned with Hebrew studies and transliteration. The subcommittee was chaired by Dr. Herbert C. Zafren.

The standard may be ordered directly from the American National Standards Institute, 1430 Broadway, New York, N. Y. 10018, at \$4.50 each.
